Top Skills

Amazon Web Services (AWS)
Python (Programming Language)
Apache Spark

Certifications

Master Data Engineering using
Azure Data Analytics
MTA 98-381 (Introduction to
programming using python)
Computer Vision Nanodegre
Data Visualization
Databricks Certified Data Engineer
Associate.

Honors-Awards

Udacity Bertelsmann Scholarship

Qasim Hassan

Senior Data Engineer | 5+ Years Architecting Data & Analytics
Infrastructure | Building Scalable Data, Gen-AI & Agentic Solutions |
Community Builder
Pakistan

Summary

I'm an experienced Data Engineer specializing in data pipelining, monitoring, handling, and Lineage projects with a proven track record of 5+ years. Proficient in drawing out technical and business value mainly by using Data Engineering tools (i.e., AWS, Azure, Databricks, Snowflake), and passionate about implementing innovative projects with a keen interest in learning and applying emerging technologies in real-time business scenarios.

:

: Amazon Web Services (AWS), Microsoft Azure
: Databricks, Snowflake
: Python, SQL, Apache Spark, Apache Flink (SQL), (Linux) Shell scripting
& : Flake8, pep8
/: NumPy, Pandas, Matplotlib Pyspark, Git, Delta Lake, Databricks Lakehouse, MLFlow Gourbi

:

: AWS S3, AWS Kinesis, AWS SNS, AWS Glue, Redshift, AWS VPC, Cloud Watch, AWS Lambda, AWS EMR, AWS Athena
: Azure Data Factory (ADF), Azure Data Lake (ADLS), Azure SQL (SQL Server), Azure Databricks, Azure EventHub, Azure AI services (Document Intelligence, Computer Vision, Speech & language)

:

- 1- Microsoft Certified Python Programmer
- 2- Databricks Certified Associate Developer for Apache Spark 3.0
- 3- Databricks Certified Data Engineer Associate
- 4- Udacity Certified Data Engineering Professional

5- Master Data Engineering using Azure Data Analytics (Udemy)

:

Contributed as a volunteer in AWS Community Builder, AWS Cloud Clubs, and AWS User Groups Karachi.

:

Passionate about leveraging data engineering skills to drive impactful solutions and collaborating with diverse teams in both professional and volunteer capacities. Open to new opportunities and challenges in the dynamic field of Data Engineering.

: qasimhassan1020@gmail.com

Experience

Tradeweb

Senior Data Engineer

October 2025 - Present (6 months)

Karāchi, Sindh, Pakistan

Saylani Mass IT Training

Lead Data Engineering Trainer

June 2023 - Present (2 years 10 months)

Karāchi, Sindh, Pakistan

Royal Cyber Inc.

3 years 3 months

Data Engineer II

October 2023 - October 2025 (2 years 1 month)

Naperville, IL

Being part of competitive & well-organized team, my major tech stack is Python, SQL, Snowflake, AWS, Prefect, Coralogix, Prometheus, etc my major key tasks that I have done till now are

- Onboarding of new dataset & creating a complete pipeline for it
- Handling Data Governance in Snowflake with service-now for request management of Access/Grants of role, table view.

- Helped my team as a key member in Server Migration for some projects in Tradeweb.
- Written a complete data quality alerting mechanism using Prometheus to check data in table/views
- Optimizing code & SQL queries to get better results like fewer failures & data gaps which help our client in terms of 99% data availability

Data Engineer I

November 2022 - December 2023 (1 year 2 months)

Karāchi, Sindh, Pakistan

As a Data Engineer, my primary Job is to design end-to-end Data Engineering solutions using cloud technologies ie., AWS, Azure, and Databricks. Some of the jobs I did are:

- Automated ETL pipeline using Azure & Databricks which fetch thousands of records from different sources.
- Data pipeline Optimization to reduce cost & runtime from 1 Hours to 20 minutes.
- Written Data pipelining (MLOPs), using Databricks & MLFlow for end-to-end Model Lifecycle.
- Complete Automated project Documentation using automated readthedocs & function docstring.
- Software Engineering aspect of writing efficient & clean pep8 standard code for data pipeline productionization.

Technical Trainee - Data Engineer

August 2022 - November 2022 (4 months)

Karāchi, Sindh, Pakistan

- Get Databricks training for Data Engineers & craft data engineering blogs for sales & customer engagement.
- Worked on industry-based multi-stack POC using Databricks, MLFlow, Amazon (S3, VPC, CloudFormation)
- Created a small front-end for using flask, HTML, and scikit-Learn for my POC
- Work in a Team Environment & followed Agile methodologies like Scrum.

Omdena

1 year 4 months

Data Engineer

July 2021 - July 2022 (1 year 1 month)

New York, United States

As Omdena Pakistan Chapter Lead, I took the initiative to remove the technology gap from Pakistan & lead an Open source Project which help data enthusiasts to learn more about Data, ML/DL

- Architecting Data Solutions & lead the team to make that solution happen
- Organized different workshops related to Computer Vision, TensorFlow, and Exploratory Data Analysis (EDA).
- The Projects that I initiated under the umbrella of Omdena Pakistan Chapter are:

1- "Reducing Energy Crises In Pakistan using Machine Learning," we identified the areas where load shedding occurs & the need to implant Solar panels to overcome this problem.

2- "Covid-19 Analysis Pakistan", we identified the impact left by covid19 both on the economy & overall effect of the corona.

Machine Learning Engineer

April 2021 - June 2021 (3 months)

As an ML Engineer, I got a chance to be an:

- Open source contributor.
- Work with a team of 48+ members from different countries.
- Solved Energy Crise's problems using Machine Learning.

The Disrupt Labs

Machine Learning Engineer

July 2019 - February 2020 (8 months)

Karāchi, Sindh, Pakistan

During my Internship and as a junior Machine Learning Engineer at Dirtrupt Labs, I got a chance to work on ML problems & designing solutions using ML/DL techniques some of my works are:

- Designing ML systems by using Machine Learning, Deep Learning, and Computer Vision Techniques.
- Selecting appropriate data sets and Identifying differences in data distribution that affects model performance.
- Managed infrastructure for a Deep Learning Training Rig-cum-server with multiple parallel GPUs
- Researching and implementing ML algorithms and tools, Running machine learning tests, Using results to improve models, Training and retraining systems when needed.

Education

Bahria University

Bachelor's of Computer Engineering, Computer Engineering · (2018 - 2022)

Saylani Mass I.T Training (S.M.I.T)

Diploma in Data Science & Artificial Intelligence, Artificial
Intelligence · (2021 - 2022)
